Submitting Images for the Monthly *Show & Share* Slide Show

Photographic Society of Parker River National Wildlife Refuge

Submission Procedure: Up to three (3) digital images may be submitted in .jpg file format. They must be sent via email attachment to showshare2012@hotmail.com by the submission deadline. Images received after the deadline will not appear in that month's slide show. The following file naming convention must be used for all submitted images:

First Name_Last Name_Image Number.jpg

<u>Example</u>:
john_smith_1.jpg
john_smith_2.jpg
john_smith_3.jpg

Image Size: Most digital images, as they come out of the camera, need to be made smaller for electronic viewing (computer monitor, web page, projector). In other words, they need to be resized. Images submitted to the *Show & Share* should be resized according to the following dimensions:

- Image with a landscape (horizontal) orientation: set the width to 1280 pixels
- Image with a portrait (or vertical) orientation: set the height to 800 pixels
- Note: Whether you are setting the width or height, you don't need to change the other dimension so long as the "constrain proportions" box is checked.

Example: Resizing an Image in Photoshop Elements

1. Click **FILE > OPEN** to open an image in the Editor.
2. Click **IMAGE > RESIZE > IMAGE SIZE**. The following dialog box appears:

If your image is in landscape orientation, change width to 1280 pixels. If your image is in portrait orientation, change the height to 800.

Make sure the "Constrain Proportions" and "Resample Image" boxes are checked.

3. Sharpen image if it needs sharpening.
4. Click **FILE > SAVE AS** to save the changes you've made and to give the image a new name (e.g. matt_poole_1.jpg). By giving the image a new name, you are creating a second image and are avoiding making changes to your original image.
